

**BOX PLUS**  
*New brain. More power.*

**STAG**<sup>®</sup>  
autogas systems

Modern and compact controller.

**Qbox Plus** modern and compact controller with an advanced feature that allows you to customize the perfect autogas settings in almost every car.

**Qbox Plus** is based on the proven controller of STAG-4 and STAG-300. It is intended for vehicles with 4-cylinder engines with indirect fuel injection.

## Qbox Plus benefits

- » auto-adaptation OBD
- » innovative auto-adaptation ISA 3
- » support for CAN and K-LINE according with OBD2/EODB
- » extended options for reading OBD with auto error canceller
- » overlap when switching fuel

**Dedicated for automotive**

The processor is designed and manufactured only for use in automobiles, features many characteristics and flawless use.

**Security for many years**

The longest warranty of product under the STAG, confirming the excellence of the controller.

Auto-Adaptation  
OBD

Auto-Adaptation  
ISA

Automatic OBD error  
canceller

*Universal controller with a choice of powerful system auto-adaptation.*

## **OBD** Auto-adaptation OBD

Auto-adaptation OBD guarantees gas injection, exactly suited to the operating conditions and engine load. Influence on the composition of the mixture not only has information about the time of injection of gasoline, but also the modification in accordance with correction of current gasoline unit.

## **ISA3** The innovative system auto-adaptation ISA3

ISA 3 is an innovative approach to auto-adaptation, which should be done after the actual time of gasoline injection with some OBD parameters.

ISA3 is:

- » dedicated map correction independent on the injection time correction turns,
- » collection of accurate reference card petrol injection time, taking into account the temperature of the engine,
- » recognition modes of closed and open loop in real time,
- » view the oxygen sensor signal from OBD of the vehicle.

## **CHECK** Automatic OBD error canceller

Automatic OBD error canceller provides deletion of selected OBD malfunctions, without the need of connecting external devices.

**STAG**<sup>®</sup>  
autogas systems

## THE BEST INSTALLATION

Based on the biggest technical knowledge of constructors from the scientific Centre, unit manufacturer specialized workshops and experience in the installation of LPG. The collection of perfect design complements the fact that STAG is 100% made by the same manufacturer, starting with technical ideas, through research and testing, finishing in the production, which relies on high quality components, manufactured in modern machine park.
